

How to install the custom indicators and templates

To install the custom indicators and templates you need to copy the unzipped folders and files to the **terminal data folder** of MetaTrader.

To open the terminal data folder, launch MT4, go to **File** and select **Open Data Folder**

The next step is to copy/merge the **MQL4** and **templates** folders (including the files) from the unzipped *fxknight.zip* to/with the **terminal data folder**.

fxknight.zip

Name ^	Date modified	Type	Size
MQL4	16-3-2014 15:04	File folder	
templates	23-1-2012 23:10	File folder	
Fibs.pdf	19-1-2012 23:07	PDF-XChange View...	229 KB

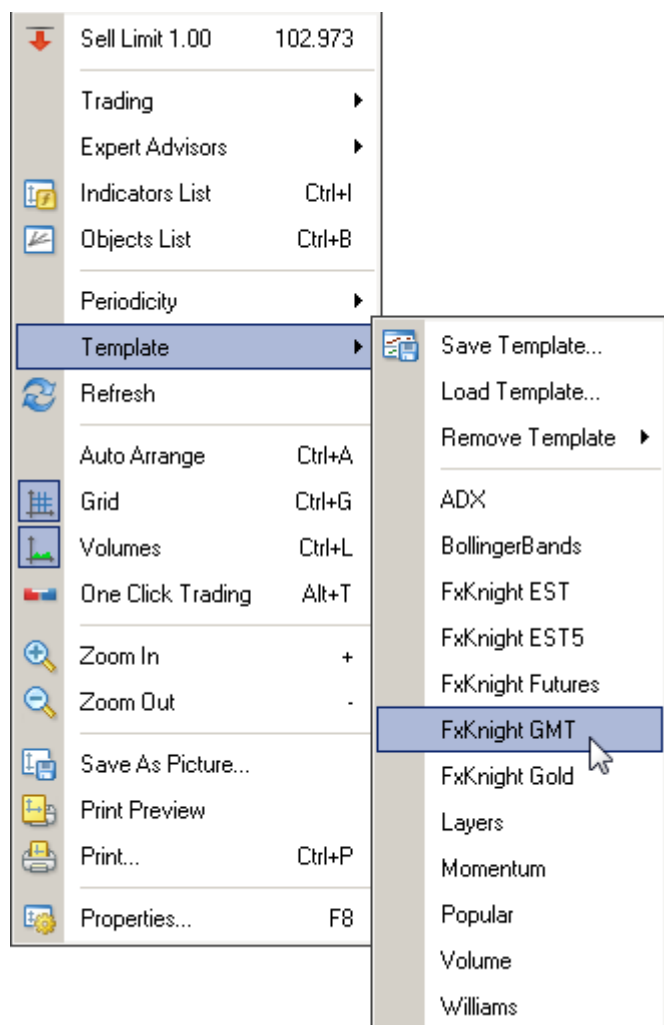

terminal data folder

Name ^	Date modified	Type	Size
config	3/3/2014 7:42 PM	File folder	
history	3/3/2014 2:35 PM	File folder	
logs	3/16/2014 2:00 PM	File folder	
MQL4	3/3/2014 2:30 PM	File folder	
profiles	3/3/2014 2:46 PM	File folder	
templates	3/3/2014 3:13 PM	File folder	

The indicators and templates are installed after you close and launch MT4.

How to load a template

Open a chart, right click on an empty area of the chart to open the following menu:

Select Template and load any of the following templates:

FxKnight GMT	Used the majority of the time, except when NY is trading alone
FxKnight EST	Used after London close, from 12:00 - 17:00 EST
FxKnight EST5	Used when NY recalculates their pivots at 17:00 EST, until Asian open
FxKnight Futures	Used for trading index futures and commodities (24 hrs)
FxKnight Gold	Used for trading gold, and other precious metals subject to the London fix

Be sure to visit www.fx-knight.com for other useful trading tools.

These templates & indicators are for Pro Trading subscribers and IB client use only – thank you for respecting copyrights and hard work. A huge thank you goes out to Yves Parent (YRP), without whose ideas and programming expertise this new version would not have been possible, as well as Terrence Staton (LaserEdge) for his contributions to the Knight Timer and Weekly Pivot indicators.
